Oxygen O2

Home Intelligent System to the new level of  
freedom and reliability

”Reliability of manual switching and freedom of the internet.  
Oxygen makes your home intelligent and obedient”

## Oxygen touch

“Simple can be harder than complex; you have to work hard to get your thinking clean to make it simple”

A touch input can control your home from anywhere any time. iPhone, Android phone or a PC from any internet connected device you can monitor and control. 20 millisecond is enough for an action. Blazing fast action.

Sean control - Control a group of lights / Fan / Air conditioner / Window-blinds as per the Sean demands.

eg: Sean - **sleep** “turn off all lights + AC temperature set to 23 degree + All blinds close + All out door light off + Gate side light on + Any movements outside turn corresponding lights ON”

Sean -**morning** “ if time is 5 am All lights on + AC temperature set to 24 degree + All blinds UP + Out door lights ON (if no sun light)”

any combination as you wish.

Floor based control

Light control, Window control, AC control, Door control

Current room temperature

Current room Humidity

Thermostat - Air conditioner control  
“+” Increase temperature  
“-” Decrease temperature  
“SAVE” Save settings

Air conditioner detailed settings -  
Fan speed/ Mode/Cool/Fan etc

Switching control - Light, Fan, TV or any appliance - Touch to turn ON/OFF

Turn on all lights / Turn off all lights

Movement sensor status / Door sensor status / Window status / any

Oxygen V2

New generation monitoring tools, LLCT, Air port road, Dubai, UAE

Wall switching : Touch screen, Touch button or manual switch oxygen supports any kind of interfacing switches. We promote reliability and easiness of manual switches along with flexibility of internet of things (IOT)

We design the system for your convenience.

## Oxygen talk

Control your home with just a voice command, World's highest accuracy in speech recognition.

Just say "Hey alexa turn on bedroom lights" it will turn on your bedroom lights. simple and easy. all above sean can activate or deactivate with just a voice command.

Oxygen talk will be an obedient servant for ever.

## Why Oxygen ?

Oxygen is simple but powerful,

It is totally different from conventional Home automation system HAS we call it Oxygen home intelligent system (HIS), It does not required to change existing Manual cabling. Oxygen based on new IOT (Internet of things) standards and protocols. TCP/IP is the main backbone communication protocol and light weight switching commands. We offered tailor made system for each cases. Oxygen will not force a user to stick with a general all purpose HAS system. it is highly flexible and configurable,

Oxygen V2 (O2) can monitor door status, LPG leak, Co2, Air quality, Air dust content, Temperature, Ultra low temperature monitoring, Light intensity, human presence, Movement detection, Thermal detectors. 24x7 full speed scanning 2000 times in a second, accurate reading and high reliability. Live push notifications - Live messenger integration with live photos. Light weight communication protocol for fast and easy notification. Few bytes can do the job. Exit door monitoring to the new level of security and protection. System can send live photos if any events happened. Live monitoring can be installed in any number of devices. Mobile device support, Can easily monitor from your convenience. Very low data consumption.

Any existing home wiring system can be converted to Oxygen intelligent home system. 3Year warranty for all our products.

Monitor and control all facility at your convenience
